Service Engineer

Job description

We are a Leading Air Conditioning & Dehumidification Company working throughout the UK, from Scotland to the Channel Islands, and are looking to fill a vacancy within our Service and Maintenance Department. Ideally you will have some experience of maintaining and repairing various types of HVAC systems, although further training will be given as required. You will be working to Planned Preventative as well as Reactive Maintenance regimes as instructed by the office team, so must be prepared to stay away and travel long distances. This may involve some overnight stays and travel. Representing the company, you will establish and maintain a good working relationship with all employees and client representatives. As travel from site to site is an important part of the position, **a full UK driver's license is essential.**

Position Summary:

- Immediate start dates available
- Competitive Salary
- Full time work – uncapped overtime
- Must be prepared to stay away and travel long distances
- Planned maintenance and reactive work
- Company Vehicle supplied

Key Responsibilities:

- Service and Maintenance of Splits, Multi Splits, VRV's and VRF's, AHU's etc.
- Service and Maintenance to a number of Retail, Commercial and Domestic Systems
- Making general repairs using hand and power tools

Key Skills/ Experience:

- Experience preferred but not essential as some training will be given
- Experience of HVAC/engineering/construction background desirable
- **Full UK Driving License essential**
- Be able to demonstrate the ability to work under pressure and to specific deadlines
- Possess good communication and interpersonal skills and the ability to work unsupervised

Please send a CV and cover letter to info@umc-ac.com
